Practical 3 Challenge

1. If you have a windows VM, install DFI software "Prodiscover" in your windows VM. Otherwise, install "Prodiscover" in your machine. "Prodiscover" software can be found on BB/Learning Resources/Other Resources/Software. Or you can download a copy of "Prodiscover" installation software from internet.

   https://prodiscover-basic.software.informer.com/8.2/

2. Add image file "Rhinousb.dd" into your VM or your machine. "Rhinousb.dd" is in your Practical 4 folder.

3. Goto "Prodiscover / Tools / Data Caving" and try to uncover hidden picture files in "Rhinousb.dd".

4. How many picture files can you undercover?

5. Paste all the picture files that you can find in a word document. Submit you word document to BB/Learning Resource/Lab Exercise Folder
